Dharmik Jethwani

Full Stack Developer

I am a highly motivated Full Stack Developer with a strong foundation in both front-end and back-end technologies. I enjoy building interactive, user-friendly, and efficient web applications that solve real-world problems. With a passion for clean code and continuous learning, I am eager to contribute my skills to a dynamic team, adapt to new challenges, and grow as a developer while delivering value through innovative solutions.

Projects

Sasta Market

Sasta Market is a web application designed to connect users with local service providers such as plumbers, painters, and carpenters. It enables users to browse services, book appointments, and receive instant notifications, while service providers can manage bookings through an intuitive dashboard. The platform features secure authentication, real-time updates, and a responsive interface for smooth user experience across devices.

Movieo

Online Movie & TV Streaming Web App
Built a Netflix-like web application using React and TMDB API as the backend data source. Implemented features like movie/TV show browsing, search, categories, and watchlist management. Designed a responsive UI with React + Tailwind CSS, and integrated secure user authentication with JWT

Certificates
